Available: Jan 01 2026 Onwards

EDUCATION

Northeastern University, Oakland, CA

Khoury College of Computer Sciences

Master of Science in Computer Science

Related Courses: Database Management System, Algorithm, Cloud Computing, Design Paradigm

Sep 2024 - Present

Expected Graduation - Apr 2026

Overall GPA - 4.00

NMAM Institute of Technology, Nitte, India

Bachelor of Engineering in Information Science

Related Courses: AI, Data Mining, Data Structures, BI, Engineering Management

Aug 2015 - Jun 2019

Overall GPA - 9.09/10

TECHNICAL KNOWLEDGE

Languages : Python, C, C++, JavaScript

Databases : MySQL, Oracle, Sqlite3, MongoDB, Redis

Data Engineering & BI Tools : IBM Infosphere DataStage, SSIS, SSMS, SSRS, PowerBi, Excel, Numpy, Pandas, Matplotlib, Apache Spark, AWS EMR(familiarity)

Cloud & Containerization : [AWS Cloud Architect](#), [AWS Machine Learning](#), Docker

Scheduling & Workflow Automation : Autosys, Tivoli Workload Scheduler

Version Control : SVN, BitBucket, GitHub

WORK HISTORY

Accenture, Bengaluru, India

Mar 2022 - Jun 2024

Data Engineering, Management and Governance Sr Analyst

- **Led** the Continuous Improvement initiative, by automating workflows across BODS, EDW, and DataStage, delivering **10+** solutions that saved **70+ FTEs annually**.
- **Automated report generation process**, reducing processing time from **30 minutes to 15 seconds**, saving **24 FTEs annually**.
- Implemented “shift-left” strategy to **reduce L2 support load by 50%**, enabling business users to independently perform monthly credit risk validations and reclaim 4 hours per cycle.
- Utilized Python and SQL for debugging and resolving critical production issues, minimizing system disruptions and improving data reliability.

Infosys, Chennai, India

Sep 2019 - Mar 2022

Senior Systems Engineer

- **Migrated 8+** legacy COBOL ETL pipelines to DataStage, achieving 98% data accuracy and improving scalability and scheduled workflows with Autosys JIL box/cmd.
- Enhanced ETL workflow efficiency by **10%** through reusable dataStage job creation.
- Collaborated with business stakeholders and Data Analysts to understand technical requirements and performed complex data transformations on large financial datasets to generate reports for downstream ingestion, enabling seamless application consumption.
- Designed and implemented complex data mappings, ensuring accuracy, consistency, and quality through data hygiene, transformation, and recalculation techniques.
- Developed and optimized shell scripts for housekeeping and file reformatting, reducing **manual effort by 8 hours annually**.

Infosys, Mysore, India

Jan 2019 - Apr 2019

Systems Engineer Intern

- Developed a BI solution to extract, transform, and load (ETL) grocery sales data using SSIS and SQL.
- Designed and implemented a data warehouse with dimensional and fact tables for efficient data analysis.
- Created dynamic dashboards and static reports using PowerBI and SSRS to provide real-time sales insights.

ACADEMIC PROJECTS

Retail Sales Analysis & Insights (Walmart Dataset), [Link](#)

July 2025 - Aug 2025

- **Performed end-to-end EDA** on large multi-store retail datasets; identified sales trends by department, store, holiday events, and markdown campaigns using **pandas** and **NumPy**; Visualising them using Matplotlib and seaborn.
- Developed and evaluated predictive models to forecast weekly sales across stores and departments, supporting data-driven demand planning and promotional strategies.

Flight Delay Prediction using AWS SageMaker, [Link](#)

Mar 2025 - Apr 2025

- Developed a machine learning model in AWS SageMaker to predict weather-related flight delays using 580K+ records, improving delay detection sensitivity from 0.2% to 11.6% after hyperparameter tuning with XGBoost.
- Performed end-to-end data preprocessing, feature engineering, and EDA on US flight data; engineered custom pipelines for ZIP-to-CSV extraction and applied one-hot encoding to optimize model input.
- Identified key trends by airline, airport, and time of day; developed visual reports and presented insights to support the hypothesis.
